- A potent storm system will continue to bring snow and hail across northwest California. An unsettled weather pattern will continue into next week. Mountain snow will continue with chain controls and delays likely.
- **Active Weather Warnings, Watches and Advisories by County:**

## **WEATHER SYNOPSIS BY REGION**

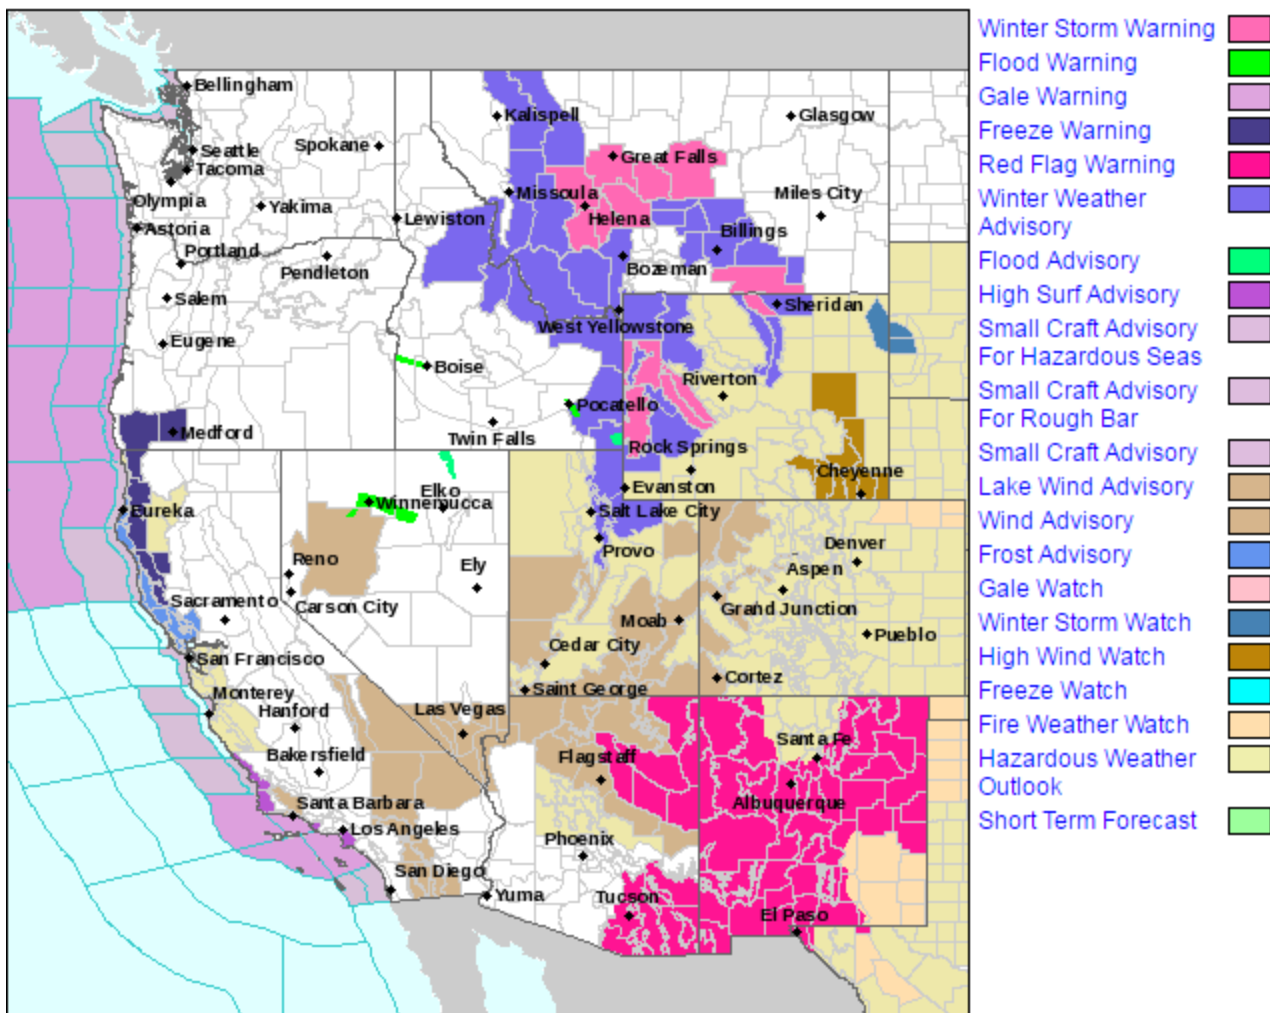

### **NORTHERN CALIFORNIA**

Showers and higher elevation snow showers will persist through the morning, with precipitation on a gradual downward trend as we head through the day. Partial clearing tonight may allow temperatures to drop sufficiently enough for patchy frost to develop across portions of the interior. More wet weather is in the forecast for next week.

### **SOUTHERN CALIFORNIA**

A few lingering showers are expected this morning as a front moves through the region. Gusty northerly winds will develop behind the exiting front affecting some areas through Sunday morning. A cooling trend will occur into this weekend. Some warming is expected the first half of the week before another area of low pressure brings cooler conditions and another chance of rain to the region late next week.
